

Light 12 volts

1m Mantle

Base plate fixing down to top of stone boulder.

LED light recessed into the centre of the plinth with top lip of light unit resting on top of plinth.

Concrete base to be installed by others 380mm x 380mm x 50mm with cable going up through the centre.

Detail

LED light to shine up through gaps in mantle petals

Conduit to be lain in between the power supply point to the centre of the plinth.

Conduit will require a low voltage cable bought up through it for light.

Waterproof enclosure fixed to a wall low down, or hidden under gravel. Please confirm how far away this is from the mantle.
